

Noffke Lumber, Inc has been building custom trusses for all markets. We specialize in building custom wooden structure building components:

- Commercial Trusses
- Residential Trusses
- Agricultural Trusses
- Floor Trusses
- Equipment and Delivery

Dedicated, trained, and skilled employees make all the difference when it comes to manufacturing any product. Our employees are committed to producing top-notch products to ensure our customers' complete satisfaction.

Engineering

We supply engineered wood products and can deliver statewide, usually within seven days. Contact us with your specifications or allow us to compare your product through our design program to ensure that it's the correct product for the job. In addition, we can also design a floor and roof system for you, including all headers and beams.

Floor Trusses

Noffke Lumber, Inc specializes in floor trusses of all sizes. Our custom-designed trusses are open web, providing space for plumbing, electrical, and ductwork. With an open web floor truss from **Noffke Lumber, Inc**, you will save on bracing and installation time.

Roof Trusses

For three generations, we have been producing roof trusses. Since we have built trusses in almost every design, we can build the truss you need for your project regardless of its size and shape. To assist you, we offer on-site visits and slab verifications.
